

NOT JUST ANOTHER CUP SYSTEM

What does the VCS cup system mean for your shop? More versatility in the paint booth.

VENTED USE: provides unrestricted paint flow, which improves color match and consistency

SEALED USE: allows the liner to collapse for painting upside down or

in hard to reach areas where inverted spraying is needed

- **VCS** Liner locks into hard cup, making lid removal easier for refilling
- Specially designed liner vent and hard cup flange eliminate drips
- 32 oz., 22 oz. and 13 oz. cup and liner sizes
- Hard cups available in Mixing Ratios or Blank versions
- Blank cups ensure mixing is completed on a paint scale
- Eliminates the need for a separate mixing cup
- One lid fits all cup sizes
- Built-in filter is removable for higher viscosity liquids such as primer filler
- Wide-mouth stainless steel adapters available for most popular spray guns (pages 4, 5, 6)
- Saves cleaning time and reduces solvent waste

Hard cup systems and liner systems can restrict paint flow and starve your spray gun

Competitor A's vented hard cup system dispensed all fluid in the cup but produced a major restriction and an inconsistent "glugging" paint flow.

Competitor B's liner system created a major restriction in the liner, showing that it would starve the spray gun of fluid and create inconsistent flow. The final 8 oz. of fluid in the cup would not flow out of the cup.

representation of fluid restriction created by

each cup.

The VCS hard cup and vented liner system dispensed all fluid in the cup, with the vent open. It produced a constant flow of unrestricted fluid for improved color match and consistent coverage.

The VCS cup system can be used at any angle, even upside down.

HARD CUPS VENTED LINERS

HARD CUPS

- Available in 32 oz., 22 oz., and 13 oz. sizes, with or without mixing ratios
- Impact resistant polypropylene is durable and easy to clean

Part No.	Product	Case Qty	Unit Qty
92130	32 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92132	32 oz. Blank Hard Cup	10 Units	2 Cups
92110	22 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92112	22 oz. Blank Hard Cup	10 Units	2 Cups
92120	13 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92122	13 oz. Blank Hard Cup	10 Units	2 Cups

VENTED LINERS

- Can be used vented or sealed
 VENTED USE: provides unrestricted paint flow,
 which improves color match and consistency
 SEALED USE: for painting upside down in wheel wells,
 rocker panels and hard to reach areas
- Locks into the hard cup, making lid removal easier for refilling
- Available in 13 oz., 22 oz., and 32 oz. sizes

Part No.	Product	Case Qty	Unit Qty
92200	32 oz. Liner	4 Units	50 Liners
92210	22 oz. Liner	4 Units	50 Liners
92220	13 oz. Liner	4 Units	50 Liners

LIDS SPRAY CENTER DISPENSER

- Unique design with 4 snap tabs eliminate the need for an additional locking ring
- Built-in filter is removable for higher viscosity materials
- Fits all VCS cup sizes

Part No.	Product	Case Qty	Unit Qty
92300	Lid with 125 Micron filter	4 Units	50 Lids 25 Caps

SPRAY CENTER DISPENSER

- Holds 200+ liners and 100+ lids
- In addition to all 3 size liners, dispenser also holds standard 32 oz. mixing cups
- Powder coated steel construction
- Clear door identifies when to refill

Part No.	Product	Unit Qty
92430	VCS Dispenser	1 Dispenser

ADAPTERS

Part No.	Product	Case Qty	Unit Qty

Don't see your spray gun listed?

A more comprehensive list of spray guns and matching **VCS** Adapters is available at semproducts.com.

STANDARD OPERATING PROCEDURES

Review crossover sheet to determine the correct adapter for your spray gun.

Insert adapter into spray gun and tighten.

INSTALL LINER

Insert liner into hard cup. Make sure to align vent tabs on liner with slots in bottom of hard cup.

Turn liner clockwise to lock in place.

Fill cup with desired material.

ATTACH LID

Firmly press lid onto assembled cup and liner.

Lock down all four lid tabs.

ATTACH CUP TO SPRAY GUN

Press adapter onto assembled cup. Align locking tabs on adapter to corresponding tabs on lid.

Turn clockwise until lid locks in place.

! Locking only takes a quarter turn.

OPEN/CLOSE VENT

Open vent in liner for most spray applications.

For inverted spray applications, close vent and allow liner to collapse.

• Don't forget to close vent for liquids storage or when inverting.

CHECK LOCAL VOC REGULATIONS TO ENSURE COMPLIANCE OF ALL PRODUCTS IN YOUR AREA.

ALWAYS WEAR OSHA REQUIRED (PPE) PERSONAL PROTECTION EQUIPMENT TO ENSURE YOUR SAFETY.
